

Pedro H. Pinto

AI Product & Engineering Leader · Agentic AI, Generative AI, Salesforce

Orlando, Florida (remote) · pedroharp@gmail.com · linkedin.com/in/pedroharp · pedroharp.github.io/personal-website

SUMMARY

Engineering and product leader with 18+ years in technology and 15 at Dell Technologies. I lead a global team of 23 engineers and product managers that builds production AI agents, generative AI content systems and Salesforce platforms, and I own the business case as closely as the architecture. Engineer by training: .NET, Python and Salesforce, with a 2025 postgraduate program in AI and machine learning from UT Austin McCombs.

EXPERIENCE

Senior Manager, Software Engineering

2019 – Present

Dell Technologies · Orlando, FL

- Lead a global team of 23 engineers and product managers across the US, Brazil, India and Slovakia, building agentic AI, generative AI and Salesforce platforms for Dell's online and sales businesses.
- Built the business unit's first enterprise agentic AI capability: production agents on the Salesforce case platform for follow-ups, first response, compliance and marketplace service, contributing to 182,000+ operational hours automated in one fiscal year.
- Launched a first-responder agent for business-sales support, projected to avoid 200,000+ hours ahead of a platform launch expected to triple case volume.
- Built an in-house generative AI content engine producing 12,500+ channel-specific content items for 4,000 products across 19 marketplace, retail, social and email channels; settled build-vs-buy with a side-by-side test against a vendor's native AI.
- Launched an AI sales-coaching platform for consumer chat sales: an LLM pipeline extracting 200+ signals per chat and a purchase-propensity model trained on 37K chats. Led the privacy impact assessment that updated Dell's public privacy notice.
- Decoupled the requester experience from Salesforce with 27 micro-frontend intake forms, cutting submission time about 80% (2 minutes to 25 seconds) for 2,500 monthly users.
- Delivered a real-time device-validation API for point-of-sale financing in India: 102K validations in 6 months, about 5-second response, zero downtime since launch.
- Organization delivered \$40.9M in incremental revenue from AI in FY26 (A/B-validated) and 4.9X ROI on operating spend. Present roadmap and financial results to business-unit senior leadership and the SVP.

Salesforce Consultant

2016 – 2019

Dell Technologies · Austin, TX

- Built Dell.com's first Salesforce Service Cloud implementation, onboarding 2,000+ users in the first five months; the platform now handles 1M+ cases a year. Presented at Dreamforce 2019.
- Integrated single sign-on, first-party APIs and custom Apex components.

Senior Project Manager · Project Manager

2011 – 2016

Dell Technologies · Austin, TX and Porto Alegre, Brazil

- Ran Dell.com content and taxonomy programs across Shop, Premier, Partner and Support; managed UX modernization of the Dell.com back end with 7+ engineering teams.
- Improved on-site search relevance through query analysis and tuning. Taught .NET and SharePoint courses as a Microsoft Certified Trainer.

Senior Software Engineer / Team Lead · Software Engineer

2008 – 2011

CI&T and earlier roles · Belo Horizonte, Brazil

- Led a four-engineer Scrum team shipping every two weeks with automated CI and code reviews; built .NET C#, SQL Server and SharePoint solutions.
- Took a client's e-commerce site to the first page of Google results; helped CI&T earn Microsoft Gold Partner status.

EDUCATION

Postgraduate Program, AI & Machine Learning

UT Austin McCombs School of Business, 2025

B.S. Computer Science

Pontifícia Universidade Católica de Minas Gerais,
2010

CERTIFICATIONS

PMP · PMI-ACP · Scrum Master · Salesforce Platform Developer I · Salesforce Administrator · Oracle AI Vector Search Professional · Microsoft Azure AI Fundamentals · Microsoft Certified Trainer

SKILLS

AI: agentic AI, LLMs (on-prem and cloud), RAG, ML model strategy

Engineering: Python, .NET C#, REST APIs, micro-frontends, CI/CD

Languages: English, Portuguese (native)

Platforms: Salesforce Service Cloud, Apex, SFDX

Leadership: roadmaps, business cases, A/B testing, exec reviews
